

# Invitation to Media Investor Breakfasts

## Opportunities in three locations across Europe - Rome, Brussels & London

The i3 project (Impact, Innovate, Invest) will host a series of Investor Breakfasts at hubs across Europe, focusing on the theme “connecting media technologies to specialist media investment.”

The investor breakfasts are open to technologies in the media and convergence domain across Europe with a particular focus for startups and projects with ICT-19 support actions. The i3 project invites interest from the media and convergence community in these events and is keen to accommodate all European technologies at the right stage.

Investors have been specifically selected for their expertise in the sector and interest in supporting innovative media technologies moving from research through to innovation and market deployment. The investors have a range of expertise and experience in multinational media organisations, media companies, agencies, and independent media specialists.

“We are delighted to be *connecting startups with investors in the media and convergence domain across Europe*” Shenja De Gaf, i3 Project Lead

In order to maximise the opportunity for the media technologies and investors, the format will be direct one-to-one breakfast meetings enabling the two parties to talk directly and in confidence for thorough and productive conversations and fruitful connections.

### Hubs & Logistics

London - to attend contact [catherine@f6s.com](mailto:catherine@f6s.com)

Brussels, - to attend contact [Jan.Waeben@imec.be](mailto:Jan.Waeben@imec.be)
